Cross-border risks for a specialist

None raised by your answers.

Unresolved questions

DATA MISSING Expected taxable supplies in the first twelve months (for VAT)

Recommendation, subject to review

No recommendation is made on this page; a person at MKW Advisors reviews the case first.

1 of 6 statements and 1 of 14 places in this report have been checked by a named person for public display; the rest are marked to be verified.

General guidance (approved wording)

How to read this result:

Each point carries a label. "Checked" means a named person at MKW Advisors has approved that statement or figure for public display. "With conditions" means it fits if something is confirmed. "To be verified" means the rule or figure exists but has not been approved for the public yet, so nothing is stated. "Data missing" means MKW Advisors does not hold the record that would settle it. "Specialist review" means a person with the right qualification looks at it before anything is concluded. Nothing here is advice until a person has reviewed your case.

Official sources

Next steps

Ask MKW Advisors to review this: a person checks every point marked to be verified, confirms what applies to you, and sends priced offers from vetted partner firms. No payment until you accept an offer.

Open the page again with your saved code to see this result on the rules of that day.

Rules and place data as of 2026-11-03.

Preliminary general information, not advice. Tasees is a service of MKW Advisors; partner firms deliver the work; MKW Advisors manages scope, price, quality and payment. Nothing is filed automatically.
